Visa Status: Employment Visa | Availability: Immediate Joiner

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 9+ years of experience architecting and delivering scalable SaaS, CRM, and ERP applications using Laravel, PHP, Node.js, JavaScript, React.js, MySQL, and PostgreSQL. Proven track record of building enterprise-grade Real Estate CRM platforms, integrating third-party property portal APIs (Bayut, Property Finder, Dubizzle), and delivering AI-powered automation features that improve business efficiency. Skilled in RESTful API design, database optimization, RBAC security implementation, and cloud deployment (AWS/Azure). Experienced in leading development teams, mentoring engineers, and collaborating with cross-functional stakeholders using Agile methodologies. Based in Dubai, UAE with immediate joining availability.

CORE TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, SQL

Backend Frameworks: Laravel, Node.js, CodeIgniter, Express.js

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Database & Optimization: MySQL, PostgreSQL, SQL Server, Query Optimization, Eloquent ORM, Database Indexing, Caching Strategies

APIs & Integrations: RESTful API Design, Google APIs, Third-Party API Integration, Bayut / Property Finder / Dubizzle APIs, WhatsApp Integration, Firebase

Architecture & Security: Service-Based Architecture, Role-Based Access Control (RBAC), Queue Workers & Scheduled Jobs, Background Processing, Code Refactoring, Object-Oriented Programming (OOP)

Cloud & DevOps: AWS, Azure, Firebase, Git, GitHub, CI/CD Basics, Version Control Workflows

Tools & Reporting: Postman, VS Code, Browsershot (PDF Generation), Excel/CSV Import-Export, Automated Reporting

AI Tools: ChatGPT, Claude, Cursor, AI-Powered Lead Scoring & Workflow Automation

Methodologies: Agile / Scrum, Sprint Planning, Code Reviews, Effort Estimation, Team Mentoring

Domains: Real Estate, Healthcare, SaaS, ERP, CRM, AI Applications, CMS / WordPress

PROFESSIONAL EXPERIENCE

Full Stack Developer Aug 2025 – Present

Property Matters Software Design LLC — Dubai, UAE

- Architected and developed an enterprise-grade **Real Estate CRM** platform supporting leading UAE real estate companies, including Driven Properties and Metropolitan Premium Properties.
- Designed and implemented scalable CRM modules for **Property Management, Lead Management, Agent Management, Client Management, and Sales Pipeline**.
- Integrated **Bayut, Property Finder, Dubizzle**, and other property portal APIs to automate listing synchronization and reduce manual publishing effort.
- Developed **AI-powered Lead Scoring**, workflow automation, and intelligent lead assignment features to improve sales efficiency.
- Built a **WhatsApp integration** for automated customer communication, notifications, and lead engagement.
- Developed secure **RESTful APIs** for web and third-party integrations following Laravel best practices.
- Optimized complex **MySQL queries, database indexing, and Eloquent relationships**, significantly improving application performance and reducing response times.
- Built automated **PDF generation** for property brochures, reports, and business documents using **Browsershot** and dynamic HTML templates.

- Developed advanced **property search, filtering, sorting, and reporting** modules handling large datasets efficiently.
- Implemented **queue workers, scheduled jobs, and background processing** for notifications, data synchronization, and automated tasks.
- Designed reusable APIs for CRM, property listings, customer management, and reporting functionalities.
- Improved application scalability through database optimization, **eager loading, caching strategies**, and efficient query design.
- Built **import/export modules** supporting Excel and CSV data migration for large-scale property and customer records.
- Integrated email services and notification systems to automate business workflows and customer communications.
- Collaborated closely with product managers, QA engineers, and business stakeholders to deliver production-ready features using **Agile methodologies**.
- Troubleshoot and resolved complex production issues while maintaining application stability and high system availability.
- Managed **Git-based version control workflows**, feature branching, merge requests, and production deployments.

Senior PHP Developer Nov 2022 – Jul 2025

HODO Medical Informatics Solutions

- Developed and maintained enterprise **healthcare management modules** using PHP, CodeIgniter, MySQL, JavaScript, and RESTful APIs.
- Designed and implemented the **Patient Workflow Management System**, automating the complete patient journey from registration and consultation to billing, pharmacy, and discharge.
- Developed the **Accounts & Finance module**, supporting day-close operations, payment collection, multiple payment methods, and financial reconciliation.
- Built the **Medicine Return Management module** to streamline pharmacy inventory adjustments and ensure accurate stock and financial records.
- Integrated **government health insurance systems** to automate insurance verification, claim processing, and patient billing workflows.
- Collaborated directly with hospitals and healthcare stakeholders to gather requirements, conduct onsite discussions, and deliver customized software solutions.
- Participated in client meetings, requirement analysis, solution design, **user acceptance testing (UAT)**, deployment, and post-production support.
- Optimized **MySQL database schemas and complex SQL queries**, improving application performance and reducing response times.
- Developed and consumed **RESTful APIs** for seamless integration between healthcare modules and external systems.
- Conducted code reviews, refactored legacy code, and implemented CodeIgniter best practices to improve maintainability and application scalability.
- **Mentored junior developers**, providing technical guidance, code reviews, and knowledge sharing to improve team productivity.
- Resolved production issues and implemented continuous improvements to enhance system stability, security, and performance.
- Followed **Agile development methodologies**, collaborating with cross-functional teams to deliver high-quality healthcare software solutions.

Technical Manager Aug 2020 – Oct 2022

Webzone Technologies — Doha, Qatar

- Led the successful delivery of **3 major client projects**, managing development from requirement gathering to production deployment.
- Conducted client meetings to understand business requirements, provide technical consultation, and deliver tailored software solutions.
- Managed project planning, task allocation, and development teams to ensure timely and high-quality project delivery.
- Designed **application architecture** and coordinated the implementation of scalable web solutions.
- Mentored developers through technical guidance, code reviews, and development best practices.
- Collaborated with QA and clients during **UAT, deployment, and post-production support** to ensure successful project delivery.

PHP Developer Aug 2017 – Aug 2020

Webzone Technologies — Doha, Qatar

- Developed and maintained scalable web applications using PHP, HTML, CSS, JavaScript, and MySQL.
- Built and integrated RESTful and third-party APIs, connecting applications with external services.
- Designed and implemented server-side logic and user-facing features for seamless application functionality.
- Optimized database schemas, performed testing, and improved application performance.
- Troubleshoot and resolved production issues to ensure system reliability and uptime.
- Mentored junior developers and promoted coding standards and best practices.

Web Developer Jan 2016 – Jun 2016

EWorld Information System — Kozhikode, Kerala, India

- Developed responsive websites using WordPress, HubSpot, HTML, JavaScript, AJAX, and JSON.
- Transformed design mockups into functional, user-friendly web applications and websites.
- Implemented SEO best practices to improve search engine visibility and performance.
- Collaborated with clients to gather requirements and deliver tailored web solutions.

WordPress Developer Jun 2015 – Dec 2016

Coregebie Technologies — Kottakkal, Kerala, India

- Developed and customized WordPress themes and admin components using WordPress core functionalities.
- Implemented SEO best practices to enhance website performance and search visibility.
- Integrated plugins and custom features to meet business and functional requirements.
- Converted PSD designs into responsive WordPress themes using HTML, CSS, and JavaScript.
